

// EMERGENCY SPILL RESPONSE

Custard's Environmental Services Division, established more than three decades ago, is one of the oldest emergency response management units in the US. We have never been affiliated with any cleanup contractor and as third-party, impartial managers of environmental claims, we ensure the most cost effective and efficient responses possible.

With one call to Custard's Environmental Hotline, you can take care of any environmental loss in the US or southern Canada. Your incident is handled by degreed environmental professionals (geologists, engineers, etc.) who are also licensed adjusters. Our professionals have decades of hands-on experience handling all types of environmental assessments and cleanups.

We have no exclusive contracts with our clients as we believe we should earn your trust and business with every assignment made. We are motivated to save you money and limit your environmental liability on every response we manage.

Custard maintains an ever-changing database of hundreds of pre-qualified environmental contractors. We have negotiated reduced pricing with those contractors and pass those savings directly to you. We do not mark up any costs and our fees are not based on the size of the cleanup invoice. When fees are based on a percentage of the cleanup costs or when contractors' invoices are marked up, there is little or no incentive to limit the scope and cost of a remediation.

While transportation losses represent the largest percentage of Custard's Environmental Division assignments, our environmental adjusters are also experienced in handling other types of environmental issues including, but not limited to:

- ☐ Underground & Aboveground Storage Tank (UST & AST) releases
- ☐ Environmental Facility Audits
- ☐ Hazardous & Non-hazardous Waste Profiling & Disposal
- ☐ Soil Contaminant Assessments & Remediations
- ☐ Groundwater & Surface Water Assessments & Remediations
- ☐ Heating Oil Tank Assessments and Remediations
- ☐ Asbestos Inspections, Removals & Evaluations
- ☐ Mold & Indoor Air Quality Assessments & Remediations
- ☐ Forensic Auditing of Scopes & Invoices

Let us show you how Custard's Environmental Services Division can save you as much as 30% or more on your environmental spills/losses. Contact us today for details.
